

Directive 97/23/CE**Keywords:**

Monitor

Pressure accessory

Flow rate

DN

Directive reference:

Article 1 § 2.1.4 - 97/23 EC

Article 3 § 1.4 - 97/23 EC

Annex II § 3 - 97/23 EC

Annex II - 97/23 EC

Adopted by CLAP:**22/09/1999****Subject:** Scope - Monitors**Question:** Are the monitors covered by the directive?**Answer:**

A monitor is a pressure accessory as defined in article 1 § 2.1.4 in which the fluid comes with a given pressure and goes out with another pressure with a given flow rate and which has no safety function.

So, for the monitors, the appropriate classification criteria is the DN (nominal diameter) (see article 3 § 1.4 and annex II § 3).

Being classified by the DN, the inclusion of monitors in the directive shall be evaluated on the basis of the tables for piping (tables 6 to 9).

NOTE: For the concept of DN, see CLAP 23 - Guideline 2/2.

Modifications compared to the previous adopted version: Editorial correction on 2004-09-16.
