

**Directive 2014/68/EU****Adopted by CLAP :** 18/11/2016**Directive References:** Article 2 § 1**Subject:** Hazards and risks analysis of an equipment**Question:** Shall the hazards and risks analysis of an equipment take into account all of its elements?**Answer:**

No

It applies to the Regulatory Scope of the equipment as it is defined, and therefore to all of its parts as defined in CLAP X207.

Nevertheless, the hazards and risks analysis may lead the manufacturer to use others elements for implementing technical measures for reducing hazards and risks. In this case, the hazards and risks analysis defines the relevant obligations applicable to these elements.
